

# Elenco acid

## Acidifier

**A strong solution to control Salmonella,  
E. Coli, Clostridia and other types of  
pathogenic bacteria, enhancing  
gut health and nutrients absorption**

# Why use Elenco acid?

The efficiency of acidifiers in preventing the development of dangerous bacteria in the gastrointestinal tract has been well investigated in poultry nutrition. The requirement to stop using growth promoters (AGPS) in poultry feed is crucial. Acidifiers have become a practical substitute in this situation. They are currently used in the poultry sector to protect business interests while battling bacterial, fungal, and mold illnesses.

## Features and Benefits of Elenco acid

- Safe and efficient antibiotic replacer with no residue in the meat
- Increase the body weight, feed utilization and FCR in broilers
- Reduce colonization of pathogens in the intestine (Salmonella, clostridia and E.coli)
- Enhances gut health by maintaining an optimal pH in the digestive tract and promoting the growth of beneficial gut microflora.
- Creates an environment unsuitable for the proliferation of harmful bacteria, reducing the risk of infections and improving flock health.
- Contributes to a robust immune response, helping poultry to better resist diseases.

## Composition

|                      |            |
|----------------------|------------|
| Lactic acid          | 10,000 mg  |
| Orthophosphoric acid | 75,000 mg  |
| Formic acid          | 100,000 mg |
| Propionic acid       | 100,000 mg |
| Calcium gluconate    | 20,000 mg  |
| Acetic acid          | 40,000 mg  |
| Propylene glycol     | 250 ml     |
| Water upto           | 1 liter    |

## Dosage

Poultry: 1-2 ml/L of drinking water

## Package

1 Liter, bottle

+351 920 359 893
