

Elenco Buty

50% SODIUM BUTYRATE

A good alternative to
antibiotics in livestock diets as
growth promoter

What is Elenco Buty?

Sodium Butyrate (50%) is derived from butyric acid, a short-chain fatty acid, and it plays several important roles in promoting the health and performance of animals, particularly in the context of livestock production. Some benefits of butyric acid are: Energy supply, Intestinal mucus synthesis, intestinal villi growth, Nutrient absorption, Pathogen control, Reduce inflammation

Features and Benefits of Elenco Buty

- Maintains and improves gut structure and health in animals
- Helps in strengthening the gut lining and promoting the growth of beneficial gut flora.
- Aids in better nutrient absorption and digestion, leading to improved overall feed efficiency
- Strengthening the immune system, reduces inflammation, and enhances overall growth performance and productivity.

Mode of action

Sodium butyrate can pass through the upper gastrointestinal tract, and begin to release butyric acid in the small intestine gradually after cleavage by pancreatic lipase

Dosage

Poultry & Aqua: 500 gr/MT of feed
Ruminants: 1 Kg/MT of feed

Package

25 Kg Bag
