

Elenco C-sal

TRIBUTYRIN

A smart, strong shield against salmonella

Why use Elenco C-sal?

The principal active compound of Elenco C-sal is

Tributyrin is the precursor of butyric acid. Is formed by the esterification of one molecule of glycerol and three molecules of butyric acid.

Butyric acid is liquid, volatile, difficult to add, and with an unpleasant smell

Tributyrin has not these characteristics and can pass through the stomach smoothly and is decomposed into butyric acid, butyric acid monoglyceride, and glycerol by lipase in the intestine, which can quickly restore nutrients for the intestinal mucosa

Features and Benefits of Elenco C-sal

- Elenco C-Sal inhibit Salmonella growth in the intestines of broilers and other livestock, lowering gut pH and creating an unfavorable environment for harmful bacteria. Elenco C-Sal help reducing scours (diarrhea), a
- common issue in young calves, and other livestock. Elenco C-Sal supports gut integrity by nourishing intestinal cells and reducing inflammation,
- which is vital for high-performance broilers and breeders. Elenco C-Sal enhance nutrient absorption, boosting growth rates and feed conversion
- efficiency. Elenco C-Sal support gut health and immune modulation during coccidiosis, which helps animals to recover from coccidiosis stress. Elenco
- C-Sal serves as an alternative to certain antibiotics contributing to sustainable livestock practices
-

Dosage

0.5 - 1 Kg/MT of feed

Composition

- Tributyrin
- Glycerol

Package

25 Kg Bag
