

Elencoegomix

Herbal extract, growth enhancer

Why use Elencoegomix?

To alleviate the risks aroused by antibiotics-resistant bacteria, effective antibiotic substitutes are urgently needed to replace antibiotics. Essential oils (EOs) derived from plants are illustrated as the promising antibiotic substitutes used in animal feeds, as same as their current views for poultry and livestock industries in the future. It has been widely demonstrated that the phytochemicals in EOs show multiple biofunctionability and are less likely to induce resistance in bacteria. Compared with antibiotics, a variety of biologically active components and a variety of targets make it difficult for bacteria to develop resistance to EOs, which is the main and most effective advantage.

Features and Benefits of Elencoegomix

- Has strong antimicrobial activity and prevents pathogen adhesion in intestinal cells and helps in balancing intestinal microbe
- Enhance the liver for the production of yolk precursors which improves egg quality and hatchability.
- Improve animal performance and the quality of meat and milk
- Improve weight gain and the reproductive parameters in ruminants

Composition

Carvacrol	201.88 gr
Thymol	16.63 gr
Anisole	18.55 gr
Menthol	76 gr
Zinc (zinc sulfate)	5 gr
Propylene glycol	100 ml
Water up to	1000 ml

Dosage

Poultry: 0.5-1 ml/L of water for 3 - 5 days

Calves: 2 ml/L of water for 3 - 5 days

Cows: 3 - 6 ml /L of water for 3 - 5 days

Camels: 3 - 6 ml /L of water for 3 - 5 days

Package

1 liter, bottle

+351 920 359 893

Avenida da Liberdade 110,
1269-046, Lisbon, Portugal
