

Elenco – Essential FA

Herbal extract, growth enhancer

Gut health

Immune stimulant

Growth promotor

Why use Elenco-essential FA?

To alleviate the risks aroused by antibiotics-resistant bacteria, effective antibiotic substitutes are urgently needed to replace antibiotics. Essential oils (EOs) derived from plants are illustrated as the promising antibiotic substitutes used in animal feeds, as same as their current views for poultry and livestock industries in the future. It has been widely demonstrated that the phytochemicals in EOs show multiple biofunctionability and are less likely to induce resistance in bacteria. Compared with antibiotics, a variety of biologically active components and a variety of targets make it difficult for bacteria to develop resistance to EOs, which is the main and most effective advantage.

Features and Benefits of Elenco-essential FA

- Enhances the immune system of poultry by strengthening its natural immune system and increasing its resistance to diseases Provides antimicrobial benefits due to its inclusion of essential oils containing
- compounds that function as antibacterial agents, such as terpenoids, flavonoids, cinnamaldehyde, and others. Supports the health and integrity of the respiratory system due to its inclusion of essential oils with antimicrobial and decongestant properties that help improve respiratory health in poultry
- Enhances egg mass and laying rate in layers Improves the digestive process in poultry by stimulating the secretion of digestive enzymes and enhancing the absorption of nutrients
-
-

Composition

Oregano oil
Anise oil
Tea tree oil
Thyme oil
Cinnamon oil
MOS
B-glucan

Dosage

Poultry and other species:
250 gr / MT of feed

Package

25 Kg Bag
