

Elenco-Flu **WS**

Herbal extract, growth enhancer

Gut health

Immune stimulant

Growth promotor

Why use Elenco-Flu WS?

To alleviate the risks posed by antibiotic-resistant bacteria, effective antibiotic substitutes are urgently needed to replace antibiotics. Essential oils (EOs) derived from plants are being explored as promising alternatives to antibiotics in animal feeds, as well as for future applications in poultry and livestock industries. It has been widely demonstrated that the phytochemicals in EOs show multiple biofunctionality and are less likely to induce resistance in bacteria. Compared with antibiotics, a variety of biologically active components and a variety of targets make it difficult for bacteria to develop resistance to EOs, which is the main and most effective advantage.

Features and Benefits of Elenco-Flu WS

- Enhances the immune system of poultry by strengthening its natural immune system and increasing its resistance to diseases
- Provides antimicrobial benefits due to its inclusion of essential oils containing compounds that function as antibacterial agents, such as terpenoids, flavonoids, cinnamaldehyde, and others. Supports the health and integrity of the respiratory system due to its inclusion of essential oils with antimicrobial and decongestant properties that help improve respiratory health in poultry
- Enhances egg mass and laying rate in layers
- Improves the digestive process in poultry by stimulating the secretion of digestive enzymes and enhancing the absorption of nutrients

Composition

Oregano oil
Anise oil
Tea tree oil
Thyme oil
Cinnamon oil

Dosage

Poultry and other species:
50 - 100 ml / 1000 L of drinkingwater

Package

0.5, 1, 5, 10, 15, 25 liters
