

Elenco Orobind Plus

Broad spectrum mycotoxin binder

Effective for several types of mycotoxins

Inhibits mold growth in feed

Powerful activator of the Immune system

Why use Elenco Orobind plus?

The presence of different types of mycotoxins in feeds is a relevant problem in the animal feed industry. Mycotoxins are harmful substances produced by fungi and they are present in various types of feed. Even at low concentrations, these toxins can negatively impact the health and performance of animals, for example, by weakening the immune system, causing tissue damage, or reducing feed intake.

Benefits of Elenco Orobind plus

- Contains 08 types of silica and selected oxides, which are effective against Afla and Ochratoxin. Contains and high concentration of B-glucans which tightly binds with several types of mycotoxins
- including Zearalenone and Trichothecenes Strong immunological action activating the innate immune response and the action of macrophages Contains lactic acid bacteria that produces organic acids inhibiting mold growth and enhancing feed safety Contains
- horseradish with bioactive compounds that can degrade some types of mycotoxins, offering a natura approach to detoxification in feed

Composition

- Yeast cell wall extract
- Clay minerals
- Horseradish
- Lactic acid bacteria

Dosage

Poultry: 1 - 2Kg/MT of feed

Dairy Cows: 10 - 20 gr/head/day

Calves: 5 - 10 gr/head/day

Small ruminants: 5 - 10 gr/head/day

Package

25 Kg Bag
