

Elenco Tox

MYCOTOXIN BINDER

Improve the feed safety
Support mycotoxins challenges
Protect the intestine and enhance immunity

Why use Elenco Tox?

The presence of mycotoxins in feeds is a relevant problem in the animal feed industry. Mycotoxins are harmful substances produced by fungi and they are present in various types of feed. Even at low concentrations, these toxins can negatively impact the health and performance of animals, for example, by weakening the immune system, causing tissue damage, or reducing feed intake.

Benefits of Elenco Tox

Contains inorganic binders based on bentonites, with adsorption sites, which are specific for the decontamination of Aflatoxins Works effectively to reduce proportions of mycotoxins in different types of feed Improves the functioning of the immune system Binds mycotoxins in the intestine and it is effective in reducing the transfer to milk and meat Elenco Tox has a high capacity to adsorb high concentrations of mycotoxins

Composition

Clay minerals 100%

Dosage

1 - 2Kg/MT of feed

Package

25 Kg Bag
