

ElencoSel

**The highly available source
of organic selenium
improves hatchability
results as well as the
performance in chickens**

SeSelenium

Features and Benefits of ElencoSel

- **Selenium (Se)** is a cofactor of glutathione peroxidase which neutralizes peroxides and protects the body against oxidative damage during growth and development
- **Se** status of the eggs from breeding birds is of great importance for the maintenance of the antioxidant system of the developing embryo. It is generally accepted that the hatching process is an oxidative stress and improvement in antioxidant defenses of the embryo can increase hatchability
- **Se** also works synergistically with vitamin E and B complex vitamins to improve disease resistance and overall immune function
- The use of **Se yeast** contributes to reducing the intensity of oxidative stress in broiler chicken meat, especially in thigh muscles

Composition

Selenium as Hydroxy-analogue of Selenomethionine	1,000 mg
Calcium Carbonate up to	1 Kg

Dosage

Poultry: 100 - 200 gr / MT of feed

Package

25 Kg, bag

+351 920 359 893

Avenida da Liberdade 110,
1269-046, Lisbon, Portugal
